

## RFP 14-11 Playground Surfacing and Play Curbing Questions Addendum

1. Do you have any quantity amounts on curbing, ADA ramps and Engineered Wood fiber or will each vendor turning in the bid be responsible for getting the takeoff amount for each? **These are to be proposed and determined by each vendor per playground bay size and safety CPSC standards.**
2. How many copies of the bid sheet would you like returned and where should the bid be returned to? **Three**
3. Who determines the amount of each product required? **Each proposer is responsible as indicated in the RFP to determine the amount of each (surfacing, ramps, and curbing) based on CPSC standards.**
4. Can you please tell me what type of Playground Curbing is required for this bid? Plastic, Wood Concrete? **Any curbing being replaced should be 4'x12' HDPE black plastic.**
5. Are the ADA Ramps to be two sided with half outside the playground and a matching 1/2 on the inside of the borders, or just half Ramps with the entrances into the playgrounds only? Ramps are to be proposed both inside and outside? **All ADA ramps are to be two sided (inside/outside)**
6. Since the spec is now 12" minimum depth on the surfacing, will concrete enclosed playgrounds require new plastic borders? **No, all bays with that are enclosed by concrete are not to be renovated with plastic borders.**
7. I see that you are requiring a finished level of 12" of wood fibers. Do you want the old material removed and 12" of new material installed or add new material to a finished depth of 12"? **Surfacing material needs to be 12' depth. Any combination to meet CPSC standards per the vendor's choice is recommended.**
8. Can you tell me which landscape contractors that normally work with your city? Possibly you have a maintenance contract with one? **This question will not**
9. Do you use someone to top off your play boxes in the past? **No. As a new department the current playground bays are what was inherited by the City of Brookhaven from Dekalb County.**
