

# GRANITE CURB

The City of Brookhaven has various regulations related to the installation, repair, and replacement of granite curb. In order to help the development community understand how these regulations apply, the City has created this guide.

## REMOVAL AND REPLACEMENT

In addition to any permit requirements, no person shall remove, damage, haul away or cause misalignment of any granite curbing on public streets, including radius curb and catch basin stones, for any reason whatsoever without first receiving written permission from the city. Granite curbing on public streets is city property.

Any removal or replacement of granite curbing on public streets must be done in accordance with section 14-670 and the specifications for granite curbing from the public works director. Granite curbs shall be removed by means to keep granite slabs intact and in a condition for re-use. Any granite curb that is removed shall be delivered to the public works department, unless otherwise authorized by the city.

## DEVELOPMENT STANDARDS

Granite curb is required to be repaired and replaced where it currently exists. Additionally, granite curb is required to be raised to a six (6) inch reveal, as needed, pursuant to the standard detail used by the City.

If granite curb exists, the standard detail and/or notes reflecting the same are required to be included on plans associated with permit applications.

Granite curb requirements are applicable to every building permit, whether or not it was shown on an already approved permit plan.

For additional information, please contact the Department of Community Development at 404-637-0500.
