

ADDENDUM #1

RFP 18-302 DESIGN SERVICES FOR STREAMBANK RESTORATION PROJECT NORTH FORK NANCY CREEK FROM MURPHY CANDLER DAM TO NANCY CREEK

1. In section 2.2. Scope of Work, there is a specific process and methodology stated for the restoration of the North Fork of Nancy Creek; however, in Task 2.3 gives the impression that design services are being requested and not set as in section 2.2. In other words, is the design already set, or agreed upon?
No set design, however WIP should be considered a guide.
2. Does the City wish to evaluate potential alternative designs that may be more natural resource and cost effective?
Only if acceptable designs under terms of 319 h funding.
3. Does the City wish to reduce risk and uncertainty in design by numerically testing the alternative designs?
Only if alternative design is acceptable under terms of 319 h funding.
4. What do we know about the existing conditions of the proposed restoration reach in terms of bank heights, angles, and composition?
Read the WIP.
5. Will the project be part of a 319-grant and require yearly monitoring and therefore require the designer to identify and locate permanent monitoring stations?
Yes.
6. Will any required yearly monitoring past post-construction be required for macroinvertebrates?
Refer to Task 10: Post-Construction Habitat Assessment.
