REQUEST FOR QUALIFICATION INTRODUCTION

SCOPE OF WORK

City of Brookhaven Council adopted the Comprehensive Transportation Plan (CTP) for the City on September 9, 2014. An update to the CTP was adopted by Council on October 13, 2020. This CTP update recommends safety and operational analysis for three intersections on Dresden Drive. Those three intersections are:

- Clairmont Road @ Dresden Drive
- Dresden Drive @ Apple Valley Road
- Dresden Road @ Caldwell Road/Ellijay Drive

The City of Brookhaven requests Proposals from firms with experience in intersection operational and safety analysis, traffic calming analysis, visioning, and design experience. The successful Consultant shall be pre-qualified with the Georgia Department of Transportation (GDOT) in relevant area classes and have experience with and knowledge of the various technical aspects of corridor analysis, traffic analysis and design, bicycle and pedestrian facility development, transit analysis and development, and public involvement.

City of Brookhaven Project Objectives

Dresden Drive is the primary east-west corridor connecting Peachtree Road/SR 141 and Clairmont Road. City of Brookhaven is undertaking an intersection operational and safety analysis for three intersections on Dresden Drive for the purpose of serving the projected traffic as well as provide facilities for bicycles, pedestrian, and transit. The primary objectives of the study will be:

- Forecasting future traffic based on existing traffic and known and planned developments in the area
- Evaluate existing traffic conditions at the intersections and expected future growth
- Evaluate existing signals and pedestrian facilities (crosswalks) for safety and efficient traffic movement
- Recommend intersection improvements for optimal traffic movement
- Evaluate the neighborhoods north and south of Dresden Road accessed from the Caldwell/Ellijay intersections for impact of future traffic growth and recommendations for additional or revised traffic calming measures

The area of evaluation along Dresden Drive will be from the eastern boundary with Peachtree Road / State Route 141 to the intersection with Clairmont Road. The area of evaluation for the neighborhoods will be between Dresden Drive and Redding Road along Caldwell Road and the connecting streets to the north and between Dresden Drive and Briarwood Road along Ellijay Drive/Coosawattee Road and the connecting streets to the south. The emphasis of this study will be placed on three intersections; Apple Valley Road, Caldwell Road/Ellijay Drive and Clairmont Road. Dresden Drive's intersections with Apple Valley Road and Caldwell Road/Ellijay Drive are both within the boundaries of the forthcoming City Centre Master Plan. Recommended improvements could be considered for implementation as part of the Master Plan as appropriate.

REQUEST FOR QUALIFICATION INTRODUCTION

Existing Conditions

Dresden Drive is currently classified as a minor arterial. The roadway is primarily a 2-lane road with right turn and left turn lanes in some locations. Current average daily traffic volumes are 12,650 vehicles per day (2017). The 2014 Comprehensive Transportation Plan (CTP) identified Dresden Drive as having a daily level service (LOS) of D. The 2020 CTP Update downgraded Dresden Drive to LOS E.

Sidewalk is present on at least one side of the street from Clairmont Road to Peachtree Road. Sidewalk is present on both sides from Skyland Drive to S. Bamby Lane, North Thompson Road to Caldwell Road and from Apple Valley Road to Peachtree Road.

The traffic signal at the intersection of Apple Valley Road and Dresden Drive is actively managed as part of Zone 1 of the Georgia DOT Regional Traffic Operations Program (RTOP), a joint program between City of Brookhaven and Georgia DOT. The intersection of Dresden Road and Peachtree Road/SR 141 is also in Zone 1 RTOP.

The City will allocate city funds to undertake this traffic analysis. No outside funding is currently provided for this study; however, it is anticipated that the city may seek state and federal funds to aid in implementation, design, and construction of projects proposed by the study. Therefore, the project is subject to federal rules and regulations and must adhere to the GDOT Plan Development Process (PDP), applicable guidelines of the American Association of State Highway and Transportation Officials (AASHTO), GDOT Standard Specifications for Construction of Transportation Systems, and applicable GDOT design guidelines.

The scope of work will consist of an assessment of the existing conditions, a traffic study, public involvement, development of alternatives and a final report.

Existing Conditions Assessment

The consultant will be expected to review the following studies, projects and planning documents that provide context for this project:

City of Brookhaven

- Comprehensive Transportation Plan (September 9, 2014)

- Comprehensive Parks and Recreation Master Plan (September 2014)
- Bicycle, Pedestrian and Trail Plan (April 2016)
- Brookhaven-Peachtree Livable Centers Initiative (LCI) (December 2016)
- City of Brookhaven Transportation and Streetscape Improvements Traffic Engineering Study (September 2017)

Other

- ARC Regional Transportation Plan (September 2017)
- DeKalb County Comprehensive Transportation Plan (May 2014)

REQUEST FOR QUALIFICATION INTRODUCTION

The consultant will develop maps and plans of the existing conditions at the intersection and in the neighborhoods using existing applicable GIS data and other City resources, along with a visual survey of the corridor. Conditions to be noted include but are not necessarily limited to:

- Roadway cross sections including existing lanes and roadway widths
- Extent and widths of sidewalks
- Existing pedestrian crosswalk locations
- Right of way limits based on City and County provided data
- DRIs and other local zoning entitlements that could have traffic impacts on the corridor
 - A chart of zoning assumptions is to be provided within the report. See illustration in Exhibit “X”.
- Planned transportation projects in or along the corridor
- Environmental Screening of potential resources (ecological, historical, archeological)

Traffic Study

The consultant will prepare a detailed traffic study for the three intersections on Dresden Drive. The study will consider future growth and zoning entitlements that will impact traffic on the intersections. The analysis must also consider the traffic conditions on Dresden Drive with and without planned transportation projects in and along the project area. The future traffic model will need to incorporate the traffic projected from known and planned developments in the area including, but not limited to:

- City Center/MARTA TOD
- Connolly Development (North Side of Dresden at Caldwell)
- North end of Apple Valley Road
- Site on SW Corner of Dresden Drive at Appalachee Drive

Some existing traffic volume and turning movement data is available through RTOP and from the city and will be provided to the successful proposal. These existing counts should be supplemented as necessary for the traffic study and to evaluate pedestrian and bicycle activity on and crossing the corridor including off peak times. Future traffic volumes should be projected and analyzed for both the build and no-build conditions the existing, 5, 15, & 25-year periods.

The consultant will provide a complete traffic study report that outlines the methodology and presents the findings and conclusions of the traffic analysis.

Intersection Visioning

The consultant, in conjunction with input from the community, will develop a comprehensive vision for the intersections. This vision shall be based on a complete streets and context sensitive approach that addresses all forms of transportation including transit, bicycles, and pedestrians.

REQUEST FOR QUALIFICATION INTRODUCTION

The final intersection improvements will consist of, at the minimum, the following for each character area:

- Possible intersection realignments
- Intersection and Lane use configurations
- Recommendations for bicycle and pedestrian facilities including pedestrian crossing locations and connections to adjacent facilities and paths.
- Signal improvements

Traffic Calming

The consultant will develop existing and future traffic forecasts for the neighborhoods in the study area based on the projected growth of traffic from future developments and impacts from the proposed intersection improvements from this study. The consultant will evaluate the traffic impacts to the neighborhoods, evaluate the existing traffic calming measures, and make recommendations for revisions or additional traffic calming measures.

Recommendations

The consultant will incorporate all the findings into a final report that includes general recommendations and a list and prioritization of potential projects. The recommendations will address typical sections, streetscape design, pedestrian and bicycle accommodation and the timing of improvements. Cost estimates will be provided for all recommended projects.

Meetings

It is anticipated that the consultant will conduct the following meetings with the city:

1. Project Kick-off Meeting
2. Presentation of Findings of Conditions Assessment and Traffic Study
3. Review of Alternatives
4. Final Report Review

Other conference calls or project coordination meetings may be scheduled as necessary during the project. The consultant will also to prepare and present at a minimum of two (2) City Council meetings – one (1) during the study development and one (1) for presentation of final report and recommendations.

The consultant will also develop and lead a Public Involvement Process (PIP) to seek public input.. The city will coordinate advertisement of the meeting and hosting of the meetings. The consultant will be responsible for preparing visual aids and presentation documents for the meeting.
