COST PROPOSAL BID SCHEDULE

INSTRUCTIONS TO BIDDERS & CONSTRUCTION ITEMS BID SCHEDULE

1. In compliance with this RFP, the Bidder proposes to enter into a Contract with the City of Brookhaven, Georgia, to provide the necessary machinery, tools, apparatus, other means of construction, and all materials and labor specified in the Contract Documents or as necessary to complete the Work in the manner therein specified within the time specified, as therein set forth.

City of Brookhaven (*hereinafter called the "Owner"*), invites bids on the forms included herewith for the renovation of

Lynwood Park Splashpad

The Bidder has carefully examined and fully understands the Contract, Specifications, Construction Drawings, and other documents hereto attached, has made a personal examination of the Site of the proposed Work, has satisfied himself as to the actual conditions and requirements of the Work, and hereby proposes and agrees that if their bid is accepted, they will contract with the City of Brookhaven in full conformance with the Contract Documents.

All work performed shall be in accordance with the Contract, Specifications, Construction Drawings, and other project documents. All materials used in the process of completion of the work included in the Contract must meet project requirements.

It is the intent of this Bid to include all items of construction and all Work called for in the Specifications, Drawings, Construction Items Bid Schedule, or otherwise a part of the Contract Documents.

In accordance with the foregoing, the undersigned proposes to furnish and construct the items listed in the attached Bid Schedule including the unit prices stated.

The Bidder agrees that the cost of any work performed, materials furnished, services provided, or expenses incurred, which are not specifically delineated in the Contract Documents, but which are incidental to the scope, intent, and completion of the Contract, shall be deemed to have been included in the prices bid for the various items scheduled.

2. Preparation of Bid:

Each bid must be submitted on the prescribed Bid Form and Construction Items Bid Schedule with all blank spaces for quantities, unit bid prices and total bid prices filled in with ink or type written on the Construction Items Bid Form. The total bid shall be written in both words and figures on the Bid Form.

3. Method of Bidding:

The Owner invites the following bid(s): **Lump Sum Bid with Unit Price Schedule**

4. Construction Items Bid Schedules:

A Construction Items Bid Schedule is included in the bid documents to assist the contractor in organizing and completing their bid. The schedule attempts to identify every construction item of the project with an associated number, description, quantity, unit price location, total price location and detail or sheet reference.

The quantities on the schedule are given only as an assistance to the contractor to aid in the bidding process and to help clarify the documents. The contractor is cautioned to not depend entirely upon the provided quantities, but to take their own quantities when preparing their bid.

The design quantities are shown in column Design QTY of the Construction Items Bid Schedule. Column Contract QTY is included on the schedule for the Contractor to place their own quantities. If the contractor discovers a significant discrepancy between their own quantities in column Contract QTY and those provided by the designer in column Design QTY, they shall contact the Owner's Representative immediately to resolve the discrepancy.

The Contractor shall complete the enclosed Construction Items Bid Schedule to include with their proposal. Contractor shall complete these schedules in their entirety and attach to the Bid Form.

5. Quantities:

Quantities of items are given to the Contractor in column Design Quantity only as a convenience to bidding. Contractor is responsible to examine the plans, specifications, documents, and site to determine if all quantities and items are adequately covered by the items on the Construction Schedule. Any significant discrepancies shall be reported to the Owner's Representative and the quantities shall be adjusted accordingly by addenda during the bid process. Contractor is responsible for verifying all stated design quantities, list them in Contractor Column F, and bid enough quantities to complete the project as designed and shown on the Construction Drawings.

Contractor has been given separate line items on the Construction Items Bid Schedule to show their General Conditions, Overhead, Fee for the project. Contractor shall not disperse these among the Bid Schedule unit items.

Blank line items are provided on the Construction Items Bid Schedule that will allow the Contractor to add any additional items or unit breakdowns that they feel were omitted on the Construction Items Bid Schedule.

6. Mobilization Limit:

This item is given to the contractor as a convenience to allow him to request funds early to initiate the construction process. This is not an open item where the contractor can pad the bid to secure deep funding before construction. The client will not approve a mobilization number that exceeds 0.5% of the Sub-Total of the base bid.

7. Construction Budget:

The construction documents of the project are designed to allow the Owner to make adjustments to the scope of work in order to keep the cost of the project within their budget. Upon determination of the most qualified bidder through the RFP process, the Owner may meet with said most qualified bidder to adjust the project scope as necessary to get within the prescribed budget, if lump sum quote is above the intended budget. This exercise is intended to reduce the total lump sum by deleting items from the Construction Items Bid Schedule until the City budget is met without having to re-bid the project.

8. Value Engineering:

Contractor is free to submit deductive recommendations to reduce the total bid amount of the contract as separate items from the lump sum bid. These may be used during the value engineering process to reduce the contract to the final budget. Value engineering recommendations shall not be used to determine the most qualified bidder through the RFP process.

9. Allowances:

Items noted as Allowance Unit Price Items will be paid for using the actual quantity required by the Work. The Contractor must document the amount of the quantities used during construction. If additional quantities of a specific item are needed, they will be added to the contract at the same unit price quoted. If the quantities are not totally used, the contractor shall credit back the unused quantities in a final change order to the contract.

10. Non-Compliance:

Any bid submitted without completed Construction Item Bid Schedules and Bid Form shall be deemed as 'Non-Compliance' and dropped from the process.
