## Execution of the Budget Establishes Fund Balance...

Conservative execution of the annual budget, positive expenditure balances and revenues above projections will add to what is called the governmental fund balance. The purpose of the City's governmental fund balance presentation is to provide near-term information on balances of spendable resources. This information is useful and necessary in assessing the City's financial sustainability. As an example, the unassigned fund balance may serve as a measurement of the City's net resources available for spending in cases of emergency or economic uncertainty.

Included in the Financial Policies sections of this budget document is a financial policy that establishes an appropriate level of fund balance. The fund balance policy also defines different categories of fund balance as required by Government Accounting Standards Board (GASB) statement 54. These categories include:

- Non-spendable
- Restricted
- Committed
- Assigned
- Unassigned

The definitions for each of these categories are detailed within the fund balance policy. The fund balance policy also includes rules for replenishment of the fund balance if it drops below the policy's stated target at fiscal year-end (FYE) of 25 percent of the subsequent year's approved expenditure budget.
